INTREPID SAFETY PRODUCTS

## For a safer work environment

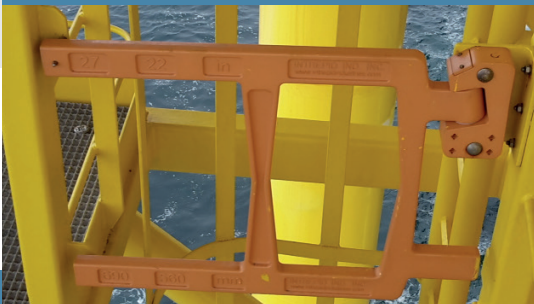

### CORROSION!

#### WHY POLYURETHANE SAFETY GATES ARE A BETTER SOLUTION FOR SEA WATER ENVIRONMENTS!

Sooner or later steel will corrode. Consequently a malfunctioning safety gate!  
Polyurethane gates have proven to be the most reliable solution to protect people against accidental fall through guardrail openings. For this reason we are specified by many multi-nationals in oil and gas, chemical plants, power plants, etc.

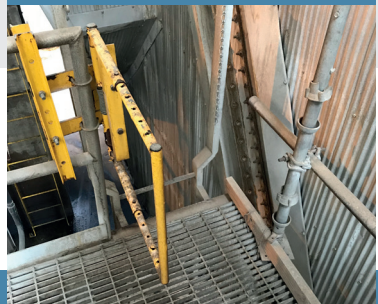

##### Polyurethane Safety Gate

No corrosion, Closed position

##### Steel coated Safety Gate

Corrosion, not closing!

## ADVANTAGES OF POLYURETHANE:

- Maintenance free
- Long service life:  
> 30 years
- Cheaper than steel
- Light weight
- Specified by many multinationals in oil and gas
- Tested and accepted by all relevant standards
- Delivery from stock
- Standard system
- Easy to install

### ABOUT ISP

Intrepid Safety Products BV (ISP) is the European distributor for self closing safety gates, manufactured by Intrepid Industries Inc. TX, USA. Since 1980, 500.000+ gates have been supplied to refineries, chemical plants, paper mills, automotive, offshore, and marine environments. Beside self closing gates ISP supplies a range of different safety related products.

**Simplicity is the key to safety!**
